# - D D DETROIT METRO AREA COMMUNITIES STUDY UNIVERSITY OF MICHIGAN 

## DMACS Wave 16 Toplines • January 26 - March 29, 2023

The Detroit Metro Area Communities Study (DMACS) is a panel survey of Detroit residents launched in 2016. The original panel of respondents was drawn from an address-based probability sample of all occupied Detroit households. In subsequent years, the panel has been refreshed through additional address-based sampling. We invited 3,202 previously-enrolled panelists to participate in this survey wave. Surveys were self-administered online or interviewer-administered via telephone between January 26, 2023 and March 29, 2023. We report results for the 1,911 Detroit residents who completed the survey. We obtained an overall response rate of $60.7 \%$ (using AAPOR Response Rate 1).

The below results reflect weighted responses. Survey weights were calculated in two stages. In the first stage, we used the technique of post-stratification to account for differential selection probabilities including oversamples in predominantly Latino block groups and neighborhoods that were targets of the Strategic Neighborhood Fund, a public/private community development initiative. In the second stage, we applied raking to adjust the weights to match the estimated distributions on gender, age, race, education, and income based on the U.S. Census Bureau's 2021 1-year estimates from the American Community Survey (ACS). Click here for more on the weighting approach. The margin of sampling error for a random sample survey of this size would be $+/-3.3$ percentage points at the $95 \%$ confidence level; the actual margin of sampling error varies by statistic due in part to the complex sample design.

## Block 8: Reparations

Now we would like to ask you a few questions about some policies to address inequality that different communities have considered in the last few years.
[The following two questions about support for reparations, rep_support_short_d16 and rep_support_long_d16, were part of a survey experiment in which respondents were randomly assigned to two groups which received slightly different versions of the same question. The first group (rep_support_short_d16) was given the following question: "Some people think that governments should make amends to Black Americans for the ongoing harm caused by slavery, or more recent discriminatory policies. What about you? How much do you support or oppose governments taking action to make amends to Black Americans? " The second group (rep_support_long_d16) was given the same question with the following additional sentence: "These include policies that led to excessive policing in Black communities and that prevented Black Americans from getting health care, receiving veterans benefits, and buying homes."]
82. Some people think that governments should make amends to Black Americans for the ongoing harm caused by slavery, or more recent discriminatory policies.

What about you? How much do you support or oppose governments taking action to make amends to Black Americans?

The next questions are about the total income of your household for the past 12 months. Please include your income plus the income of all members living in your household (including cohabitating partners and armed forces members living at home). Please count income before taxes and from all sources (such as wages, salaries, tips, net income from a business, interest, dividends, child support, alimony, and social security, public assistance, pensions, or retirement benefits).
