MIMACS Flint Wave 2 Toplines ● January 26 - March 29, 2023

The Michigan Metro Area Communities Study (MIMACS) is designed to provide a reliable source for timely and relevant public opinion data in select Michigan communities by using state-of-the-art scientific methods to obtain the most representative insights available. MIMACS engages with community partners to solicit input on questionnaires and to help interpret results and disseminate them to the community. The original panel of Flint respondents was drawn in February 2022 from an address-based probability sample of all occupied Flint households. For this second survey wave, we invited all 5,000 Flint households that were invited to the first wave, including the 628 Flint residents who completed the first survey and the 4,372 who were invited to the first survey wave but did not complete it. Surveys were self-administered online or interviewer administered via telephone between January 26, 2023 and March 29, 2023. We report results for the 576 Flint residents who completed the survey. We obtained an overall response rate of 13.0% (using AAPOR Response Rate 1); 60.0% for existing panelists and 5.4% for new panelists.

The below results reflect weighted responses. This survey is based on a stratified random sample with three strata: likely African American households, likely Hispanic households, and all others. Respondents were assigned a design weight that was equal to the inverse of the selection probability (the number of households in the area as estimated by the Census, divided by the number of sampled households in each strata, multiplied by the number of residents in the selected household). We applied raking to adjust the weights to match the estimated distributions on gender, age, race, education, and income based on the U.S. Census Bureau's 2021 American Community Survey (ACS) 5 year estimates. The margin of sampling error for a random sample survey of this size is 5.9% percentage points at the 95% confidence level; the actual margin of sampling error varies by statistic.

Block 8: Reparations

Now we would like to ask you a few questions about some policies to address inequality that different communities have considered in the last few years.

[The following two questions about support for reparations, rep_support_short_f2 and rep_support_long_f2, were part of a survey experiment in which respondents were randomly assigned to two groups which received slightly different versions of the same question. The first group (rep_support_short_f2) was given the following question: "Some people think that governments should make amends to Black Americans for the ongoing harm caused by slavery, or more recent discriminatory policies. What about you? How much do you support or oppose governments taking action to make amends to Black Americans? " The second group (rep_support_long_f2) was given the same question with the following additional sentence: "These include policies that led to excessive policing in Black communities and that prevented Black Americans from getting health care, receiving veterans benefits, and buying homes."]
